

Single-door data media safe with maximised internal capacity and two-hour certified fire protection

DataGuard NT

FIRE-RESISTANT DATA MEDIA PROTECTION

Key Features

- Certified NT Fire 017 – 120 Diskette for two-hour protection of data media from fire.
- Single-door safe with no insert required – means internal capacity is maximised and up to 60% more storage space than other safes in the same class.
- User-friendly, slam-action door. When shut, provides full fire protection without the need to be locked.
- Shelving and drawer units supplied as standard.
- Available in four sizes, ranging from 29–128 litres.
- Choice of key or electronic locking.

Chubb safes

Trusted the world over.

Product Specifications

Model	External (mm)			Internal (mm)			Internal Volume (litres)	Weight (kg)	Fittings	
	Height ¹	Width	Depth ¹	Height ²	Width ²	Depth			Shelf	Extendable Drawer
25	530	546	566	280	346	306	29.6	145	1	0
40	700	546	566	450	346	306	47.6	190	1	1
80	1025	546	590	775	346	330	88.5	263	1	2

¹External heights and depths include plinth and handle projection

²Internal heights and widths are also equal to the clear opening measurements

Lock Options

All models can be fitted with either a key lock or an electronic lock.

Internal Fittings

Shelf and extendable drawer.

Certification

NT Fire 017 – 120 Diskette

DataGuard NT carries the highest level of certification possible for a data media safe – 120 minutes of fire protection.

The range has been tested and certified in accordance with the NT Fire 017 standard in class 120 Diskette.

Fire Test

The safe is placed inside a furnace where it is exposed to fire for two hours. During that period the temperature inside the furnace reaches over 1000°C.

Whilst exposed to the extreme heat, the temperature inside the safe is constantly measured. Since information stored on digital media is so heat-sensitive, the internal temperature of the safe must not exceed 52°C at any point of the test.
